Trial Corner PRD

Objective: Reduce Day 0 Trial Cancellations by solving **Mandate Fear**. We will replace the user's "defensive strike" (canceling to avoid charges) with a **"Safe Zone"** that guarantees control.

---

1. The Problem: "The Defensive Strike"

- **The Data:** 42% of users cancel trials within 24 hours, 25% of these cancel before watching any content between 5 mins to 2 hours.
- **The Psyche:** Users pay ₹1 and cancel immediately as a defensive measure to avoid "hidden" auto-pay charges. They feel like **prey** & they want to be **explorers**.

2. Solution : "Trial Corner"

To address the **Ghost Exit** rate, we will launch a dedicated **Trial Corner**:

- **Transparency:** Persistent display of "Remaining Days" with easy, upfront **Cancellation and Pause** options.
- **Loss Aversion Education:** If a user navigates to cancel, explicitly inform them: *"Canceling now will result in immediate loss of your remaining 6 days of free access."*
- **The "Reminder" Nudge:** Instead of a hard "Cancel," offer a **"Set a Reminder"** option. We will notify the user 24 hours before the trial ends so they can cancel then if unsatisfied, allowing them to explore in peace.
- **The "Incentive" Offer:** If the user persists in canceling, trigger a "First Month Discount" offer to convert the exit intent into a high-value subscription.

---

3. Design Direction

1. The Core Messaging Strategy

The tone must be **transparent, non-threatening, and empowering.** We shift from "hidden terms" to "open promises."

- **The Power Statement:** *"You're in control. Explore in peace - we'll handle the reminders."*
- **The Value Warning:** *"Don't cancel in a hurry! Canceling ends your free access immediately. Stay protected and stay entertained."*

2. UI Components & "Trust" Copy

A. The Entry Point (Header/Home)

A persistent, high-visibility widget that acts as a "security blanket."

- **Visual:** A shield or clock icon.
- **Copy:** "Trial Mode: 6 Days Remaining. **Manage Control Center →**"

B. The "Trial Corner" Hub (The Safe Zone)

Once clicked, the user sees a dedicated dashboard with:

- **Status:** "Your ₹1 trial is active."
- **The Promise:** "Easy cancellation anytime. No hidden loops."
- **Cancel & Pause Button** : Buttons for Cancelling & Pausing Trial.
- **The "Relax" Toggle:** A button labeled **"Remind me 24h before trial ends."**
  - *Micro-copy:* "We'll send a WhatsApp/Push notification so you can decide then. No accidental charges.

C. The "Loss Aversion" Exit Gate

If the user still clicks "Cancel/Pause Trial," we trigger this specific intervention:

- **Headline:** "Wait! Don't lose your free days."
- **Body:** "If you cancel/pause now, you lose access to all premium content **immediately**. You still have 6 days of uninterrupted entertainment left."
- **Primary Action:** "Keep Trial & Set Reminder" (High prominence).
- **Secondary Action:** "Cancel/Pause Anyway & Lose Access" (Low prominence).

3. The Conversion Bridge (The Incentive)

If they persist in canceling, we move from "Saving the Trial" to "Securing the Subscriber."

- **The Offer:** Give offer like : "Lock in 50% off your first month now."
- **The Trust Clause:** "Pay ₹XX today to secure this discount. Your paid subscription will **only start after**your 7-day trial ends. Total peace of mind."

4.User Flow

Entry Points:

1. Homepage widget for Day 0 & Day 1 (For Trial Active)
2. Homepage floating pill from Day 2 to Day 10 (For Trial Active)
3. Active Indicator or Profile Icon (For Trial Active)
4. Replace Manage Trial inside functionality with this flow (For Trial Active)
5. Homepage widget for pause & cancelled

Trial Corner:

1. On clicking homepage widget, floating pill, Manage trial section user will see trial active corner.
2. Page is structure is divided into 5 parts:
   a. **Hero:** Trial Status (Top) (Trial Remaining Days)
   b. **Progress & Benefits :** Shows how much library they've explored & trial benefits
   c. **Engagement:** Show their acquired content until consumption 90, so they can start consuming or resume consuming. Post Consumption 90 show top 1 content in similar genre of their acquired content. (Auto Play the trailer if not started)
   d. **Trending:** Top 10 shows+movies in their primary dialect.
   e. **Manage Trial :** Remind me before trial ends, support chat, pause trial, cancel trial
3. For Trial Active Users, content will be accesible. For users who have paused or cancelled all content sections will be locked.

Manage Trial:

1. **Remind Me :** If User turns this toggle, he should receive a whatsapp notification 24hrs before trial ends.
2. **Support :** Redirects user to chat support/whatsapp support section
3. **Pause :** User will see a pop-up with option to remind later & pause if user clicks on pause trial pauses, and his trial corner and home widget gets updated to paused design.
4. **Cancel :** User will see a pop-up with option to remind later & cancel if user clicks on cancel → gets a offer pop-up(if activated from backend→ (discounted price & offer title is backend controlled)→grab offer his 1st month mandate gets discounted)→If cancelled anyway, trial gets cancelled and feedback pop-up appears → then his trial corner & home widget gets updated to cancelled trial design.

---

5. Experiment Targeted Cohort

- Trial Corner gets assigned to users who doesn’t start consumption in first 5 mins post activating their trial.
- Users who will see trial corner will not see any onboarding experiments. It will be mutually exclusive to other pre trial & post trial experiments.

6. Events

Event Name	Attributes	Trigger

`trial-corner-widget-viewed`	`which varient (home-trial active/pause/cancel), pill,manage subscription`)	When user views trial corner widget
`trial-corner-widget-clicked`	`which varient (home-trial active/pause/cancel), pill,manage subscription`)	When user clicks trial corner widget
`trial-corner-viewed`		When user views trial corner
